

The Future of spa design is here today!

STRONG'S FORGE-CAST™ AND ENERGY-LOK™ TECHNOLOGY

- Strong Spa's patent-pending, dual-walled FORGE-CAST™ system is **extremely energy efficient**, reduces noise and still provides **easy access** to all internal components.

- The unique ENERGY-LOK™ insulation system injects high density Foam between the walls of the dual-walled system resulting in no harmful release of CFCs into the environment and a highly efficient thermal system.

- Heat generated by the pumps in the internal cabinet air space is **recycled and utilized by your spa**, saving energy and money!

STRONG'S INSULATED BASE

- Impervious to the elements.
- More than 10x thicker than most standard 1/4" spa bases.
- Insulated and efficient, it saves energy and helps keep your spa hot!

- Strong Spa™ Cabinets will never require maintenance and come with a **Lifetime Warranty!**

- Our exclusive **HydroDrive pump system** powers more gallons of water per minute using less energy and less money!

- **Energy Efficient** – Use less energy and save money with lower operating costs. Our systems filter and heat more water and cost less to operate than even a standard 1/16 hp circulating pump and Friction heater.

- Corona ozonator creates a cleaner, more efficient spa using **fewer chemicals**.

- Lucite™ Acrylic shells are reinforced with our environmentally-sound StrongBond™ rigidizing system. No harmful release of Styrene into the atmosphere! It's the **eco-Friendly alternative to fiberglass!**

- Strong Spa™ Cabinets contain no wood or structural metal and are **100% Recyclable!**

A spa cabinet so strong it's **Guaranteed For Life**.
A spa so efficient it **Saves you Money**.

GO GREEN. GO STRONG™

New this season!

CREATE A SPA RETREAT AT HOME

Relax at home.

Strong Spas are luxurious, energy-efficient and feature the most advanced technological breakthroughs in the industry. Our elegant, patented DURA-LAST™ cabinets are beautiful and durable.

UNLIKE OTHER SPAS, THE STRONG SPA CABINET REQUIRES NO MAINTENANCE AND WILL BE JUST AS BEAUTIFUL YEARS FROM NOW AS THE VERY FIRST DAY. WOOD FRAMES WILL ROT, WARP AND FADE. STEEL FRAMES WILL RUST AND WEAKEN BUT THE DURA-LAST™ CABINET WILL NEVER DETERIORATE AND WE GUARANTEE IT WITH THE INDUSTRY'S FIRST LIFETIME WARRANTY!

Energy Smart

Every Strong™ acrylic spa features our exclusive TRIBRID™ Synergy Heating System. Our stainless steel, true all-season heater is enhanced with our ThermoCELL friction heat source... 2 heat sources running at the cost of one! Plus, the heat generated by the pumps in the internal cabinet air space is recycled and utilized by your spa, saving energy and money!

Our patent-pending, double-walled FORGE-CAST™ system reduces noise and is extremely energy efficient while still allowing easy access to all internal components. The patent-pending ENERGY-LOK™ insulated cabinet base and walls have a unique double-walled construction that is filled with high-density, closed cell foam, similar to a Thermos or freezer.

Therapy For Mind and Body

Strong's Acrylic Spas are designed for maximum hydrotherapeutic benefits. Dedicated neck & shoulder jets, pulsators and spinners isolate and massage the areas where most people carry tension. Each Strong Spa is fitted with Waterway™ jets which allow you to control the pressure and direction of flow to relieve stress and muscle fatigue. Strong Spas feature incredibly comfortable seating featuring body loungers and captain's chairs for as many as seven adults.

While you relax, enjoy the LED light system that changes color with the touch of a button. A powerful HydroDrive pump system drives the jets and provides maximum water flow. Microban® treated filters help maintain a healthy spa environment, and most Strong Spas are equipped with ozonators, naturally reducing the amount of chemicals needed.

A Commitment to the Environment

All Strong Spas are built with a commitment to the environment. Our DURA-LAST™ patented cabinet is constructed with partially recycled materials; helping to reduce plastic in landfills. The unique ENERGY-LOK™ insulation system injects foam into a closed chamber resulting in almost zero release of CFCs into the environment. Strong Spas uses an exclusive StrongBond™ rigidizing system on our Lucite® acrylic shells instead of environmentally unfriendly fiberglass. This eliminates Styrene, a hazardous air pollutant, from the manufacturing process. We achieve all this while offering gorgeous looks and the lifetime warranty on our DURA-LAST™ cabinet.

Strong Spas cabinet systems come with a LIFETIME WARRANTY against deterioration, cracking, peeling and rotting!
