Resin Base

Eco-friendly
production
alternatives.

Dual-Walled,
No-Maintenance
Cabinet is Quiet,
Energy Efficient,
100% Recyclable
and Guaranteed for
Life!

Insulated Resin Base

- Impervious to the elements
- More than 10x thicker than other spas' standard 1/4" base.
- Requires no spa pad, saving hundreds of \$\$\$ on installation
- So efficient! Saves Energy and keeps your spa hot!

*Spa water kept at 102° with controls in economy mode. Heater operation may vary depending on installation and ambient conditions. Electric cost will vary by region.

A spa cabinet so strong it is
Guaranteed for Life

A spa so efficient it
Saves you Money

- Our patent-pending, double-walled FORGE-CAST™ system is extremely energy efficient, reduces noise and still provides easy access to all internal components.
- The unique THERMO-LOK™ insulation system injects 3.9 lbs. high density foam between the solid resin walls of the double-walled system resulting in almost zero release of harmful CFCs into the environment and creating a highly efficient thermal environment.
- Heat generated by the pumps in the internal cabinet air space is constantly being recycled and utilized by your spa, saving energy and money!
- Energy Efficient. Our pumps filter and heat more water and cost less to operate per day than even a standard 1/16 hp circulating pump!
- STRONG spa cabinets contain no wood or structural metal and are 100% Recyclable!
- STRONG spa cabinets require NO maintenance
- More efficient, cleaner, requires fewer chemicals.
- Environmentally-sound Acrylobond... Styrene Free, has zero VOCs (Volatile Organic Compounds). The eco-friendly alternative to fiberglass!
